

Free Trial Class for Aircraft Maintenance Technology Program

On 27 Feb, a bunch of lucky students owned a chance to join the trial class at Despark PJ, they now had more idea about the career talk of aircraft maintenance engineering; introduction to a/c cockpit layout design; briefing on basic aircraft systems too.

Our aircraft maintenance engineering course and program offered is compatible with the European Aviation Safety Agency (EASA) syllabus, preparing students for the Aircraft Maintenance Technology Engineer License (LAME). Industrial training is one of the essential subject under the course and jobs with the aviation partners are guaranteed for Despark aircraft maintenance engineering college Students.
